In the Matter of the Appeal of	:
	: DECISION
	AFTER
	: FAIR
	HEARING
from a determination by the New York City	:
Department of Social Services	:

JURISDICTION

Pursuant to Section 22 of the New York State Social Services Law (hereinafter Social Services Law) and Part 358 of Title 18 NYCRR, (hereinafter Regulations), a fair hearing was held on March 20, 2019, in New York City, before an Administrative Law Judge. The following persons appeared at the hearing:

For the Appellant

For Centers Plan For Healthy Living (Managed Long-Term Care Organization)

D. Ferguson, Fair Hearing Representative

ISSUE

Was Centers Plan For Healthy Living's determination to authorize Personal Care Services for Appellant in the amount of 8 hours per day, 7 days a week correct?

FINDINGS OF FACT

An opportunity to be heard having been afforded to all interested parties and evidence having been taken and due deliberation having been had, it is hereby found that:

1. The Appellant, , has been in receipt of a Personal Care Services Authorization in the amount of 8 hours per day, 7 days a week.

FH# 7917339Z

2. On September 14, 2018, a nursing assessor completed a Uniform Assessment System evaluation of the Appellant's personal care needs.

3. On December 3, 2018, a different nursing assessor completed another Uniform Assessment System evaluation of the Appellant's personal care needs.

4. By notice dated January 16, 2019, the Managed Long-Term Care Plan's determined to partially deny the Appellant's request for an increased Personal Care Services authorization from 52.5 hours per week to 84 hours per week because the service is not medically necessary. The Plan approved an increase from 52.5 hours per week to 56 hours per week.

5. By notice dated January 17, 2019, the Managed Long-Term Care Plan's determined to deny the Appellant's appeal on the grounds that the service is not medically necessary.

6. On February 26, 2019, the Appellant requested this fair hearing.

APPLICABLE LAW

Social Services Law §365-a(2) provides that "Medical assistance" shall mean payment of part or all of the cost of medically necessary medical, dental and remedial care, services and supplies, as authorized in this title or the regulations of the department, which are necessary to prevent, diagnose, correct or cure conditions in the person that cause acute suffering, endanger life, result in illness or infirmity, interfere with such person's capacity for normal activity, or threaten some significant handicap and which are furnished an eligible person in accordance with this title and the regulations of the department.

Social Services Law §365-a(2)(k) provides that such care, services and supplies shall include care and services furnished by an entity offering a comprehensive health services plan, including an entity that has received a certificate of authority pursuant to sections forty-four hundred three, forty-four hundred three-a or forty-four hundred eight-a of the public health law (as added by chapter six hundred thirty-nine of the laws of nineteen hundred ninety-six) or a health maintenance organization authorized under article forty-three of the insurance law, to eligible individuals residing in the geographic area served by such entity, when such services are furnished in accordance with an agreement approved by the department which meets the requirements of federal law and regulations.

The United State Department of Health and Human Services (Health Care Finance Administration) has granted the State of New York a waiver under Section 1115 of the Social Security Act to permit the operation of a demonstration waiver program for Managed Care Programs in which certain eligible Medicaid recipients are subject to mandatory enrollment. An "Operational Protocol" (Protocol) has been approved by the Health Care Finance Administration as required by the Terms and Conditions governing the demonstration waiver. Such Protocol details the day-to-day operations of the program.

GIS 11 MA/009 provides that effective August 1, 2011, personal care services for non-dual eligible individuals are the responsibility of Managed Care Organizations and are now part of the Medicaid Managed Care Benefits Package under the Medicaid Managed Care Contract.

Pursuant to Social Services Law §365-a(2)(e) Medicaid provides personal care services, including personal emergency response services, shared aide and an individual aide, subject to the provisions of subparagraphs (ii), (iii), and (iv) of this paragraph, furnished to an individual who is not an inpatient or resident of a hospital, nursing facility, intermediate care facility for the mentally retarded, or institution for mental disease, as determined to meet the recipient's needs for assistance when cost effective and appropriate, and when prescribed by a physician, in accordance with the recipient's plan of treatment and provided by individuals who are qualified to provide such services, who are supervised by a registered nurse and who are not members of the recipient's family, and furnished in the recipient's home or other location.

Social Services Law §365-a(2)(e)(iv) provides that personal care services pursuant to this paragraph shall not exceed eight hours per week for individuals whose needs are limited to nutritional and environmental support functions.

18 NYCRR 505.14(a) governs the scope of personal care services available under the Medicaid Program for both fee-for-service and Medicaid Managed Care.

Section 505.14(a)(1) of the regulations defines “Personal Care Services” to mean assistance with nutritional and environmental support functions and personal care functions. Such services must be essential to the maintenance of the patient’s health and safety in his or her own home....”.

- (2) **Continuous personal care services** means the provision of uninterrupted care, by more than one personal care aide, for more than 16 hours in a calendar day for a patient who, because of the patient’s medical condition, needs assistance during such calendar day with toileting, walking, transferring, turning and positioning, or feeding and needs assistance with such frequency that a live-in 24-hour personal care aide would be unlikely to obtain, on a regular basis, five hours daily of uninterrupted sleep during the aide’s eight hour period of sleep.

- (4) **Live-in 24-hour personal care services** means the provision of care by one personal care aide for a patient who, because of the patient’s medical condition, needs assistance during a calendar day with toileting, walking, transferring, turning and positioning, or feeding and whose need for assistance is sufficiently infrequent that a live-in 24-hour personal care aide would be likely to obtain, on a regular basis, five hours daily of uninterrupted sleep during the aide’s eight hour period of sleep.

- (5) Personal care services shall include the following two levels of care, and be provided in accordance with the following standards:

- (i) Level I shall be limited to the performance of nutritional and environmental support functions.

- (b) The authorization for Level I services shall not exceed eight hours per week.

- (ii) Level II shall include the performance of nutritional and environmental support functions and personal care functions.

- (a) Personal care functions include assistance with the following:

- (1) bathing of the patient in the bed, the tub or in the shower;
- (2) dressing;
- (3) grooming, including care of hair, shaving and ordinary care of nails, teeth and mouth;
- (4) toileting; this may include assisting the patient on and off the bedpan, commode or toilet;
- (5) walking, beyond that provided by durable medical equipment, within the home and outside the home;
- (6) transferring from bed to chair or wheelchair;
- (7) turning and positioning
- (8) preparing meals in accordance with modified diets, including low sugar, low fat, low salt and low residue diets;
- (9) feeding;
- (10) administration of medication by the patient, including prompting the patient as to time, identifying the medication for the patient, bringing the medication and any necessary supplies or equipment to the patient, opening the container for the patient, positioning the patient for medication and administration, disposing of used supplies and materials and storing the medication properly;
- (11) providing routine skin care;

- (12) using medical supplies and equipment such as walkers and wheelchairs; and
- (13) changing of simple dressings.

Section 505.14(a)(3)(iii) of the regulations provides that Personal care services, including continuous personal care services and live-in 24-hour personal care services as defined in paragraphs (2) and (4), respectively, of this subdivision, shall not be authorized to the extent that the patient's need for assistance can be met by the following:

- (1) voluntary assistance available from informal caregivers including, but not limited to, the patient's family, friends, or other responsible adult;
- (2) formal services provided or funded by an entity, agency or program other than the medical assistance program; or

GIS 12 MA/026 provides as follows concerning the availability of 24 hour, split-shift personal care services in connection with the case of Strouchler v. Shah:

It is the Department's policy that 24-hour split-shift care should be authorized only when a person's nighttime needs cannot be met by a live-in aide or through either or both of the following: (1) adaptive or specialized equipment or supplies including, but not limited to, bedside commodes, urinals, walkers, wheelchairs, and insulin pens, when the social services district determines that such equipment or supplies can be provided safely and cost-effectively; and (2) voluntary assistance available from informal caregivers or formal services provided by an entity or agency.

When a person's nighttime needs cannot be met by the use of adaptive or specialized equipment or supplies or voluntary assistance from informal caregivers or formal services, a determination must be made whether the person needs 24-hour split-shift care (included within the regulatory definition of "continuous personal care services") or live-in 24-hour personal care services. Under Section 505.14, this depends on whether the person needs "some" or "total" assistance with toileting, walking, transferring, or feeding, and whether these needs are "frequent" or "infrequent", and able to be "scheduled" or "predicted".

The intent of the regulation is to allow the identification of situations in which a person's needs can be met by a live-in aide and still allow the aide to have an uninterrupted five hours for sleeping. The Department is considering changes to the regulations to better achieve this goal.

In the meantime, the Department provides the following clarifications:

- 1. The fact that a person's needs are predictable does not preclude the receipt of 24-hour split-shift care, if the person has a documented medical need for the tasks to be performed

with a frequency that would not allow a live-in aide to perform them and still obtain an uninterrupted five hours of sleep.

2. The need for turning and positioning and/or the need for diaper changes, by themselves, neither preclude nor justify the receipt of 24-hour split-shift care. In order to receive 24-hour split-shift care, the person must have a documented medical need for those tasks to be performed so frequently that a live-in aide cannot provide them and still obtain an uninterrupted five hours of sleep.

3. A person with a documented medical need for turning and positioning may, if otherwise appropriate, qualify for either 24-hour split-shift care or live-in care depending on the frequency at which turning and positioning is required at night, regardless of whether the person has a nighttime need for transferring.

4. When determining whether a person requires 24-hour split-shift care or live-in care, the local professional director must consider whether the physician's order and other required assessments document the following:

- The existence of a medical condition that directly causes the person to need frequent assistance with personal care services tasks during the night;
- The specific task or tasks with which the person requires frequent assistance during the night;
- The frequency at which the person requires assistance with these tasks during the night;
- Whether the person requires similar assistance with these tasks during the daylight hours and, if not, why not;
- The informal supports or formal services that are willing, able and available to provide assistance with the person's nighttime tasks;
- The person's ability to use adaptive or specialized equipment or supplies to meet his or her documented medical need for assistance with nighttime tasks; and whether the person's physician has documented that, due to the person's medical condition, he or she could not safely use the equipment or supplies; and
- Whether a live-in aide would likely be able to obtain an uninterrupted five hours of sleep were live-in services to be authorized.

DISCUSSION

The record in this case establishes that the Appellant, [REDACTED], has been in receipt of a Personal Care Services Authorization in the amount of 8 hours per day, 7 days a week. By notice dated January 16, 2019, the Managed Long-Term Care Plan's determined to partially deny

the Appellant's request for an increased Personal Care Services authorization from 52.5 hours per week to 84 hours per week because the service is not medically necessary. The Plan approved an increase from 52.5 hours per week to 56 hours per week. By notice dated January 17, 2019, the Managed Long-Term Care Plan's determined to deny the Appellant's appeal on the grounds that the service is not medically necessary.

At the hearing, the Appellant's Representative presented a March 13, 2019 letter from Dr. [REDACTED] listing the Appellant's medical problems. The medical problems are:

[REDACTED]. The PCS hours are 9 a.m. to 5 p.m., 7 days per week. The Appellant's Representative contends that the Appellant cannot walk without being guided, she ambulates with a walker and she needs to be guided to the bathroom, the Appellant needs assistance with toileting (getting on and off the toilet) after the PCS leaves, meal preparation, medication, etc. He submitted pictures of the Appellant using a bypass machine to breath.

In support of its determination, the Agency submitted the September 14, 2018, the Uniform Assessment System (UAS) evaluation of the Appellant's personal care needs. The September 14, 2018 assessment states maximal assistance-Help throughout task, but performs less than 50% of task on own: managing medications, phone use, stairs, transportation, bathing, personal hygiene dressing upper and lower body, walking, locomotion, toilet use and transfer, bed mobility. It states extensive assistance-Help throughout task, but performs 50% or more of task on own: eating. It states total dependence-full performance by others during entire period: equipment management, meal preparation, ordinary housework, managing finances, shopping. Section F comments states in pertinent part: Member requires assistance with ADLS and IADLS due to OA, chronic fatigue, SOB, and weakness. Member requires weight bearing assistance from PCA when walking. The Appellant is frequently incontinent.

On December 3, 2018, a different nursing assessor completed a Uniform Assessment System evaluation of the Appellant's personal care needs. It is the same outcome as the September 14, 2018 UAS. However, as per the December 3, 2018 (UAS) the Appellant is total dependence for transportation, stairs, locomotion.

The January 17, 2019 Final Adverse Determination states that during her December 3, 2018 UAS "showed that her abilities to perform physical function stayed the same to perform personal hygiene (cleaning herself), toilet use, dressing upper and lower body, eating, medication management, ordinary housework, eating, meal preparation and bed mobility (moving around the bed). Therefore, her hours stayed the same at 56 hours per week."

Upon due consideration of the evidence, the MLTCP's determination is not sustained. Contrary to the Final Adverse Determination that the Appellant's abilities to perform physical function stayed the same, the December 3, 2018 UAS states that the Appellant is total dependence for locomotion (how moves between locations on same floor (walking or wheeling)). Based on the Appellant's total dependence for locomotion, this would affect her ability to perform ADLS and IADLS which require movement from one place to another, i.e.

FH# 7917339Z

toileting, meal preparation. In essence, the Appellant is unable to perform the above ADL's and IADLS independently. Therefore, the Appellant's request for an increase in hours from 56 hours per week to 84 hours per week is sustained.

DECISION AND ORDER

Centers Plan for Health Living's January 17, 2019, determination to deny a request for an increase in Personal Care Services, for the Appellant, from 56 hours per week (8 hours per day, 7 days a week) to 84 hours per week is not correct and is reversed.

1. Centers Plan For Healthy Living is directed to authorize Personal Care Services to the Appellant in the amount of 84 hours per week.

Should Centers Plan For Healthy Living need additional information from the Appellant in order to comply with the above directives, it is directed to notify the Appellant promptly in writing as to what documentation is needed. If such information is requested, the Appellant must provide it to Centers Plan For Healthy Living promptly to facilitate such compliance.

As required by 18 NYCRR 358-6.4, Centers Plan For Healthy Living must comply immediately with the directives set forth above.
